### **PROFESSIONAL ACCOMPLISHMENTS**

**I AM PROUD OF:** Purchasing a piece of land and turning it into a 173-acre certified organic Community Supported Agriculture farm when I was 20 years old. Receiving the prestigious Joshua Venture Fellowship for my nonprofit work establishing rehabilitative and educational gardens in prisons, schools and summer camps. Playing a key role in redirecting more than three million pounds of Whole Foods Market grocery waste away from the landfill and turning it into Farmer D Organics Biodynamic Blend Compost.

### **PERSONAL ACCOMPLISHMENTS I AM**

**PROUD OF:** Being a pioneer of organics and being green 15 years ago when everyone thought I was nuts. Helping initiate a homeless gardening project in Savannah to teach homeless families how to grow their own food, while providing funds for them to buy local organic produce at the farmers market. Becoming an avatar master, which is an intensive course of experimental exercises that enable you to rediscover yourself and align your consciousness with what you want to achieve in the world.

**IN A MATE:** Intelligence, trustworthiness and being someone who cares about certified organic products.

**DEAL BREAKERS:** Dishonesty, disrespect and poor communication.
